Immortalcode Software Solutions Private Limited

Assistant Professor 2009 - 2019
Multiple Engineering Colleges from Maharashtra

PUBLICATIONS

- Published 05 International Papers + 01 National Conference

ACHIEVEMENTS

- Secured 4th Rank in M.E. (Computer Networks)
- Published 05 international research papers
- Designed and Developed more than 50 softwares
- Appreciated by the Superintendent of Police

CONTRIBUTION

- Cybersecurity Awareness & Digital Forensics
- Software Development and Tech Consultation
- Academic Leadership & Policy Advisory
- Community Development through Awareness Programs

SKILLS

- Laravel
- Network and Infrastructure Security
- VAPT
- JavaScript
- MySQL
- REST APIs
- Cloud Servers
- Apache/Nginx
- Git
- Secure Web Development

PROJECT SECTORS

Information Technology & Software Product Development

- Designed and delivered scalable web and enterprise applications with secure, modular architectures across multiple industries.

Cybersecurity, VAPT & Data Protection

- Conducted vulnerability assessments, security hardening, and privacy risk mitigation aligned with industry and regulatory standards.

Data Privacy & Regulatory Compliance

- Implemented privacy-by-design frameworks, consent workflows, and data protection controls.

Cloud Computing, Cloud Servers & Secure Hosting

- Architected and managed cloud server environments, VPS infrastructure, and secure hosting with performance and resilience.

Data Center Infrastructure & Operations

- Supported data center feasibility, infrastructure planning, capacity assessment, and operational readiness for enterprise deployments.

EdTech & Skill Development Platforms

- Built large-scale learning, certification, and assessment platforms supporting thousands of users with automation and analytics.

FinTech & Financial Services Technology

- Developed secure transaction systems, compliance-driven workflows, and financial data platforms with strong audit controls.

Government & Public Sector Systems

- Implemented compliance-focused digital platforms and reporting systems aligned with public sector governance requirements.

ESG, Sustainability & Governance Platforms

- Designed ESG data collection, validation, and reporting systems to support regulatory disclosure and stakeholder transparency.

E-Commerce, Digital Marketing & Analytics Systems

- Implemented scalable e-commerce platforms and analytics-driven marketing systems to improve visibility

Enterprise Resource Planning (ERP), MIS & Workflow Automation

- Automated enterprise workflows, reporting, and decision support systems to improve operational efficiency

Training, Certification & Large-Scale Assessment Systems

- Delivered secure training and certification platforms with integrity controls, and high-volume user support.

EDUCATION

PhD in Cyber Security

Kennedy University, France

2026

Master of Engineering - M.Engg, Comp. Networks

Savitribai Phule Pune University

2010-2013

Bachelor of Engineering - BE, Computer Science

Solapur University

2005-2009
